HASLAR

We still carry the excitement and the love which we had back in 2002 when we entered the sector.

As a consequence of our long on-going R&D process, we have taken the first steps to establish a new product line and offer our dearest customers to quality products. Our expert staff and our experience in the sector is at your disposal.

With approximately 50 employees, we are like a family which tries its best to move the company forward. Moreover, we are in a pursue of a place in both domestic and foreign market.

With positive feedbacks we had from domestic and foreign market, we think we are on the right path and continue to serve our customers by expanding our product line. We are also aware of the market conditions and the players in it, and we took into consideration the importance of quality and the brand value.

Therefore, we always keep in mind to have European standarts in the creation of our brand and our products. We also want to thank our suppliers and our dearest customers for their continuous support.

OUR VISION

To manufacture office and school supplies at the European standards which the customers can buy with trust and with a modern design, to make **PENMARK** a pioneer brand and a supplier in both Turkish and world standards.

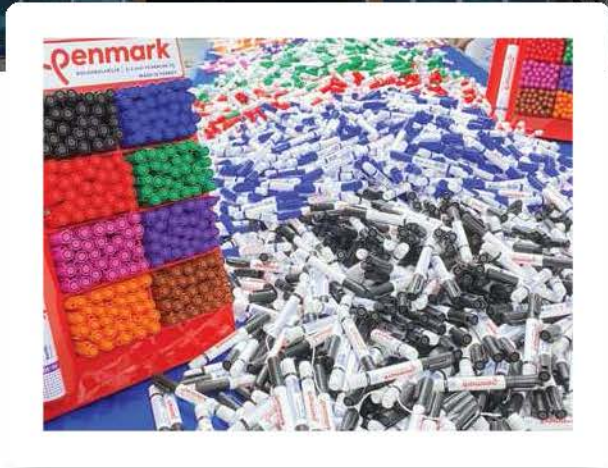

OUR MISSION

We are in this sector for 20 years, and we wish to put this experience into use by entering into a new formation and expand our brand name and quality to both the domestic and foreign markets in the production of pens.

We have prioritized the R&D according to daily needs and tried our best to satisfy these needs.

Day by day, we are growing our production line and offer new products to our customers.

Our efforts are directed at becoming the world's and Turkey's pen supplier.
